PROFESSIONAL SUMMARY

AI-Integrated Full-Stack Engineer with 6.5+ years of experience designing, developing, and deploying scalable web applications, backend systems, and AI-powered platforms. Strong expertise in building production-grade full-stack solutions using React.js, Next.js, Node.js, FastAPI, and Django, with deep focus on system architecture, RESTful APIs, and microservices-based distributed systems.

Advanced experience in integrating AI capabilities into production systems, including Generative AI applications, LLM-powered services, Agentic AI workflows, and automation pipelines using API-based AI models, embeddings, and intelligent orchestration systems. Proven ability to design scalable SaaS platforms, optimize backend performance, and deliver high-availability systems with modern DevOps practices including Docker and CI/CD pipelines.

TECHNICAL SKILLS

Languages: Python3, JavaScript, TypeScript

Agentic AI & Generative AI: LLMs (OpenAI, DeepSeek, Hugging Face, Ollama), RAG Pipelines, Vector Embeddings, Semantic Search, AI Agents, Agentic Workflows, Tool Calling, Function Calling, Prompt Engineering, AI Orchestration, Multi-Model Systems

Frontend Development: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Responsive UI Design, Component-Based Architecture

Backend Development: Node.js, Express.js, FastAPI, Django, RESTful APIs, GraphQL, WebSockets, Asynchronous Programming, Celery, Redis

Databases: PostgreSQL, Prisma, MongoDB, Redis, Supabase

Authentication & Security: JWT, OAuth 2.0, Auth0, RBAC, Secure API Design, CSRF Protection, Session Management

System Design & Architecture: Microservices Architecture, Scalable Backend Systems, Distributed Systems Fundamentals, Event-Driven Architecture

API & Integrations: REST APIs, Webhooks, Third-Party Integrations (Stripe, PayPal, Twilio, Firebase)

DevOps & Cloud: Docker, Docker Compose, Nginx, GitHub Actions, CI/CD Pipelines, AWS (EC2, S3, Lambda), VPS Deployment

Testing & Monitoring: Postman, Logging, Sentry

Tools: Git, GitHub, Linux, VS Code, Cursor, AntiGravity

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer

Kliky AI | Kuwait | 2024 – Present

- Led end-to-end development of an AI-driven platform focused on Generative AI, Agentic AI workflows, and scalable full-stack architecture.
- Built backend systems using FastAPI, Django, microservices architecture, REST APIs, async workflows, and third-party AI service integrations.
- Designed and integrated AI capabilities including text-to-image generation, face swap, OCR, video/audio processing, and multi-model AI orchestration.
- Developed agentic workflows for autonomous task execution, API orchestration, decision-making flows, and real-time AI automation.
- Created an intelligent admin dashboard to manage AI services, credit systems, user activity, usage analytics, billing, and operational workflows.
- Integrated payment systems, webhooks, AI APIs, GPU-based services, and cloud deployment pipelines for reliable production operation.
- Deployed applications using Docker, AWS, and CI/CD pipelines for automated releases.
- Collaborated with cross-functional teams in Agile environments to deliver production-ready features.

Full-Stack Developer

AJATH INFO TECH PVT. LTD. | India | 2021 – 2023

- Built a multilingual video translation application using AI-powered speech-to-text, text-to-speech, transcription, and dubbing workflows.
- Integrated Generative AI services, real-time transcription features, secure session handling, REST APIs, and third-party service integrations.
- Implemented authentication and security practices including JWT, CSRF protection, hashing, and secure API communication.
- Implemented **real-time features using WebSockets and Redis caching**, reducing server load by **25%** and improving real-time data delivery performance.
- Designed and optimized **PostgreSQL/MySQL database schemas**, improving query performance by **30%** through indexing and query optimization techniques.
- Implemented secure authentication and authorization systems using **JWT and RBAC**, reducing unauthorized access risks and improving system security compliance.
- Led participation in **system design discussions and code reviews**, improving code quality and reducing production bugs by **20%**.
- Enhanced application scalability and performance through **backend optimization and caching strategies**, supporting increased concurrent user load.
- Assisted in deployment using **Docker and CI/CD pipelines**, reducing deployment time by **40%** and improving release reliability.

Full-Stack Developer

SARAJ SYSTEM PVT. LTD. | India | 2019 – 2021

- Developed responsive and high-performance frontend applications using **React.js, Next.js, HTML5, CSS3, and Tailwind CSS**, improving UI responsiveness by **40%**.
- Built scalable backend APIs using **Node.js, Express.js, and Django**, supporting multiple production modules and improving system stability.
- Designed and optimized **Prisma and PostgreSQL database structures**, reducing query execution time by **25%** through schema refinement.
- Implemented secure authentication systems using **JWT and OAuth-based flows**, improving login security and session reliability.
- Integrated **real-time communication systems using WebSockets and Redis**, improving data synchronization speed by **30%**.
- Contributed to system architecture decisions, improving **API structure consistency and scalability across modules**.
- Optimized backend performance and reduced API latency by **20–30%** through code refactoring and caching strategies.
- Worked in Agile environment, contributing to sprint planning, debugging, and production deployments with improved delivery consistency.

EDUCATION

High School Diploma in Computer Science / Information Technology

Geeta University | 2020

SELECTED PROJECT STRENGTHS

Full-Stack Engineering: End-to-end application development using React.js, Next.js, Node.js, Express.js, FastAPI, and Django, delivering scalable and production-ready systems.

System Design & Backend Architecture: Design of scalable backend systems and microservices architectures using REST APIs, event-driven systems, Redis, and asynchronous processing.

Data & Performance Engineering: Strong experience in database design, optimization, and caching strategies using PostgreSQL, MySQL, MongoDB, and Redis.

DevOps & Deployment Engineering: Hands-on experience with Docker, CI/CD pipelines, GitHub Actions, AWS, and VPS deployment, enabling automated and reliable production systems.

API & Integration Engineering: Development of secure REST APIs, WebSockets, and third-party integrations including payment, messaging, and cloud services.

AI-Integrated Full-Stack Systems (Support Skill): Integration of AI-powered features into full-stack applications using API-based models and automation workflows.
