

# RAMESH KUMAR DAS

Backend Engineer | Node.js, FastAPI, Django | REST APIs | Microservices | Prisma | PostgreSQL  
[\[Portfolio\]](#) | [\[GitHub\]](#) | [\[LinkedIn\]](#) | [\[mrmdasdeveloper@gmail.com\]](mailto:mrmdasdeveloper@gmail.com) | [\[+977-9700864900\]](tel:+977-9700864900) | [\[Projects\]](#)

## PROFESSIONAL SUMMARY

Backend Engineer with 6+ years of experience designing, building, and scaling high-performance backend systems and APIs. Expertise in developing secure, scalable, and distributed backend architectures using Node.js, FastAPI, and Django. Strong background in RESTful API design, microservices architecture, database optimization, and event-driven systems. Proven experience in building production-grade backend services, improving system performance, and handling high-concurrency workloads. Skilled in authentication systems, caching strategies, asynchronous processing, and cloud-based deployments using Docker and CI/CD pipelines.

## TECHNICAL SKILLS

**Languages:** Python3, JavaScript, TypeScript

**Backend Development:** Node.js, Express.js, FastAPI, Django, RESTful APIs, GraphQL, WebSockets, Asynchronous Programming, Celery, Redis

**System Design & Architecture:** Microservices Architecture, Scalable Backend Systems, Distributed Systems Fundamentals, Event-Driven Architecture

**Databases:** PostgreSQL, Prisma, MongoDB, Redis, Database Optimization, Indexing, Query Tuning

**Authentication & Security:** JWT, OAuth 2.0, Auth0, RBAC, Secure API Design, CSRF Protection, Session Management

**Performance & Scaling:** *Caching Strategies (Redis), Load Optimization, API Performance Tuning, High-Concurrency Systems*

**API & Integrations:** REST APIs, Webhooks, Third-Party Integrations (Stripe, PayPal, Twilio, Firebase)

**DevOps & Cloud:** Docker, Docker Compose, Nginx, GitHub Actions, CI/CD Pipelines, AWS (EC2, S3, Lambda), VPS Deployment

**Testing & Monitoring:** Postman, Logging, Sentry

**Tools:** Git, GitHub, Linux, VS Code, Cursor, AntiGravity

## PROFESSIONAL EXPERIENCE

### Senior Full-Stack Developer

Kliky AI | Kuwait | 2024 – Present

- Designed and developed scalable full-stack web applications using React.js, Next.js, Node.js, and FastAPI.
- Built and maintained RESTful APIs and backend services supporting high-traffic production systems.
- Developed microservices-based architecture to improve scalability and system maintainability.
- Implemented authentication and authorization systems using JWT and OAuth 2.0.
- Optimized database performance in PostgreSQL and MongoDB for large-scale applications.
- Deployed applications using Docker, AWS, and CI/CD pipelines for automated releases.
- Integrated third-party APIs including payment gateways, messaging services, and cloud tools.
- Collaborated with cross-functional teams in Agile environments to deliver production-ready features.

### Full-Stack Developer

AJATH INFO TECH PVT. LTD. | India | 2021 – 2023

- Designed and developed scalable backend systems using **Node.js, Express.js, FastAPI, and Django**, supporting multiple production applications.
- Built and optimized **RESTful APIs**, improving system response time by **35%** through query optimization and caching strategies.
- Implemented **microservices-based architecture**, improving system scalability and modularity for large-scale applications.
- Designed and optimized **PostgreSQL and MySQL database schemas**, reducing query execution time by **30%** using indexing and optimization techniques.
- Built **real-time backend systems using WebSockets and Redis**, improving data delivery speed and system responsiveness by **25%**.
- Implemented secure authentication and authorization systems using **JWT and RBAC**, improving system security and access control.
- Developed asynchronous background processing systems using **Celery and Redis queues**, improving task execution efficiency.
- Participated in **system design, backend architecture planning, and code reviews**, improving code quality and maintainability.
- Deployed backend services using **Docker and CI/CD pipelines**, reducing deployment time by **40%** and improving release stability.

# Full-Stack Developer

SARAJ SYSTEM PVT. LTD. | India | 2019 – 2021

- Developed and maintained backend APIs using **Node.js, Express.js, and Django**, supporting multiple business modules.
- Designed scalable **RESTful API architectures** for frontend and third-party integrations.
- Built and optimized **relational database structures (MySQL, PostgreSQL)**, improving query performance by **25%**.
- Implemented **authentication systems using JWT and OAuth 2.0**, improving security and session reliability.
- Developed **real-time communication features using WebSockets and Redis caching**, improving system responsiveness by **30%**.
- Optimized backend performance and reduced API latency by **20–30%** through refactoring and caching improvements.
- Contributed to system architecture design discussions, improving scalability and API consistency.
- Worked in Agile environments with sprint planning, debugging, and production deployment responsibilities.

## EDUCATION

**High School Diploma in Computer Science / Information Technology**

Geeta University | 2020

## SELECTED PROJECT STRENGTHS

**API Engineering:** Design and development of **high-performance RESTful APIs, WebSockets, and scalable backend services** for production applications.

**System Architecture:** Experience in building **microservices-based and distributed backend systems** with modular, scalable architecture.

**Data Engineering:** Strong expertise in **database design, query optimization, indexing, and caching strategies** using PostgreSQL, MySQL, MongoDB, and Redis.

**Performance Engineering:** Optimization of backend systems for **low latency, high throughput, and concurrent user handling** using caching and async processing.

**Deployment Engineering:** Experience with **Docker, CI/CD pipelines, AWS, VPS deployment, and production environment management**.
